PROYECTO VALLE DE NACO

Date 2-27-95

Substance Ceramic

Lot Number PVN 185/07

Object Censer

Cat No: 185/07-7 Multiples? (a, b, c, etc.)

Cat by: LO

Drawn by: 35

Field Description:

Paste Group (censers + figurines):

Thickness ~~7mm~~ 0.7cm

Handle width

Form (censers):

Height ~~7.2mm~~ 7.2cm

Handle thickness

Width ~~4.6mm~~ 4.6cm

Diameter

Full

Verbal Description

A small fragment of a complex censer plate w/ place of attachment w/ censer prong visible. Fragment shows no decorations. Some tiny striations visible in small patches of thin, parallel striations. These ~~run~~ primarily run parallel to rim, though some are angled. Underside of plate shows slight greasing, especially at either side of prong. Rim of plate to left of prong heavily charred, this charring continues on top of plate on this side of prong & up the side of the prong to the termination of the prong fragment. Right side of prong & top of plate to the right also heavily burnt. ~~Interior~~ Interior face of prong ~~also~~ at attachment of plate also shows some burning. Entire piece is quite grey.

backwards

Fragment also shows clear evidence of manufacture processes - because of the 2 concentric circles of clay visible on top of plate, we can see that the prong was attached to the plate by surrounding it w/ a ring of clay which was then smoothed into

the plate.
